## Basics

```
USE sql_store;

SELECT *
FROM customers
WHERE state = 'CA'
ORDER BY first_name
LIMIT 3;
```

- SQL is **not** a case-sensitive language.
- In MySQL, every statement must be terminated with a semicolon.

## Comments

We use comments to add notes to our code.

```
-- This is a comment and it won't get executed.
```

## SELECT Clause

```
-- Using expressions
```

```
SELECT (points * 10 + 20) AS discount_factor
FROM customers
```

Order of operations:

- Parenthesis
- Multiplication / division
- Addition / subtraction

```
-- Removing duplicates
```

```
SELECT DISTINCT state
FROM customers
```

## WHERE Clause

We use the WHERE clause to filter data.

Comparison operators:

- Greater than: >
- Greater than or equal to: >=
- Less than: <
- Less than or equal to: <=
- Equal: =
- Not equal: <>
- Not equal: !=

## Logical Operators

```
-- AND (both conditions must be True)
SELECT *
FROM customers
WHERE birthdate > '1990-01-01' AND points > 1000
```

```
-- OR (at least one condition must be True)
SELECT *
FROM customers
WHERE birthdate > '1990-01-01' OR points > 1000
```

```
-- NOT (to negate a condition)
SELECT *
FROM customers
WHERE NOT (birthdate > '1990-01-01')
```

## IN Operator

```
-- Returns customers in any of these states: VA, NY, CA
SELECT *
FROM customers
WHERE state IN ('VA', 'NY', 'CA')
```

## BETWEEN Operator

```
SELECT *
FROM customers
WHERE points BETWEEN 100 AND 200
```

## LIKE Operator

```
-- Returns customers whose first name starts with b
SELECT *
FROM customers
WHERE first_name LIKE 'b%'
```

- %: any number of characters
- \_: exactly one character

## REGEXP Operator

```
-- Returns customers whose first name starts with a
SELECT *
FROM customers
WHERE first_name REGEXP '^a'
```

- ^: beginning of a string
- \$: end of a string
- |: logical OR
- [abc]: match any single characters
- [a-d]: any characters from a to d

## More Examples

```
-- Returns customers whose first name ends with EY or ON
WHERE first_name REGEXP 'ey$|on$'

-- Returns customers whose first name starts with MY
-- or contains SE
WHERE first_name REGEXP '^my|se'

-- Returns customers whose first name contains B followed by
-- R or U
WHERE first_name REGEXP 'b[ru]'
```

## IS NULL Operator

```
-- Returns customers who don't have a phone number
SELECT *
FROM customers
WHERE phone IS NULL
```

## ORDER BY Clause

```
-- Sort customers by state (in ascending order), and then
-- by their first name (in descending order)
SELECT *
FROM customers
ORDER BY state, first_name DESC
```

## LIMIT Clause

```
-- Return only 3 customers
SELECT *
FROM customers
LIMIT 3
```

```
-- Skip 6 customers and return 3
SELECT *
FROM customers
LIMIT 6, 3
```

## Inner Joins

```
SELECT *
FROM customers c
JOIN orders o
    ON c.customer_id = o.customer_id
```

## Outer Joins

```
-- Return all customers whether they have any orders or not
SELECT *
FROM customers c
LEFT JOIN orders o
    ON c.customer_id = o.customer_id
```

## USING Clause

If column names are exactly the same, you can simplify the join with the USING clause.

```
SELECT *
FROM customers c
JOIN orders o
    USING (customer_id)
```

## Cross Joins

```
-- Combine every color with every size
SELECT *
FROM colors
CROSS JOIN sizes
```

## Unions

```
-- Combine records from multiple result sets
SELECT name, address
FROM customers
UNION
SELECT name, address
FROM clients
```

## Inserting Data

```
-- Insert a single record
INSERT INTO customers(first_name, phone, points)
VALUES ('Mosh', NULL, DEFAULT)

-- Insert multiple single records
INSERT INTO customers(first_name, phone, points)
VALUES
    ('Mosh', NULL, DEFAULT),
    ('Bob', '1234', 10)
```

## Want to Become a SQL Expert?

If you're serious about learning SQL and getting a job as a software developer or data scientist, I highly encourage you to enroll in my Complete SQL Mastery Course. Don't waste your time following disconnected, outdated tutorials. My Complete SQL Mastery Course has everything you need in one place:

- 10 hours of HD video
- Unlimited access - watch it as many times as you want
- Self-paced learning - take your time if you prefer
- Watch it online or download and watch offline
- Certificate of completion - add it to your resume to stand out
- 30-day money-back guarantee - no questions asked
